

eWorkshops

Put your imagination into action!

Choose three!

It's up to you, there's a workshop for every flavor! Build your customized daily schedule with the three workshops that interest you.

Innovate!

Guided by eCamp's professional counselors, you'll create cool projects and take them home.

Work like the pros!

Use the best software and hardware from: Adobe®, Microsoft®, Apple®, Autodesk®, Sony®, Wacom® and more.

Take it home!

At eCamp, you will receive a USB Flash Wristband for storing all of your awesome projects. It is unbelievably cool and it's a great way to keep all your files and memories.

Questions?

Find the eWorkshops page on eCamp4u.com to see sample projects and understand better what you will do in each workshop.

Register Now!

Go to eCamp4u.com, register online for eCamp, and then make your eWorkshops selection on the "My Account" page.

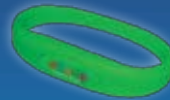

Design Your
GAMES

Create Your
MUSIC

Build Your
ROBOTS

Choose your three workshops!

1. Flash Animations

Draw your characters and edit your scene using the most advanced animation software out there - Adobe® Flash®. Create your full animation for the web and add interactivity to make your movie pop!

2. 3D Modeling

Take your first step in the virtual reality world and model objects and scenes in 3D Studio Max®. Add lights, textures and cameras to create simple 3D animations!

3. Digital Comics

Grab a digital pen and start drawing! You will use Adobe® Photoshop® and a Wacom® digital drawing tablet to draw your original storyboard, and print the finished product.

4. Video Filming

YouTube™ is waiting for your incredible videos! Plan the script, record the action with an HD camera and learn the basics of Adobe® Premiere® to edit the scenes!

5. Special FX Editing

Use Adobe® After Effects® to create a video clip with amazing effects. Combine real-world shots with your own imaginary scenes and use the cutting edge hardware and software!

6. Digital Music

The eCamp music studio is where the party begins and you are the DJ! Create your own tracks using mixing and editing software, and use the special editing keyboard to record original tunes!

7. Digital Photography

Use digital cameras and explore different settings and modes to take incredible photos. Manage an online gallery and learn how to do cool things with your pictures!

8. Graphic Design

Use Adobe® Photoshop® to edit, manipulate and apply effects. Your new T-shirt can have a picture of you and your friends on the other side of the world!

- \$25 Lab fee (includes printed T-shirt to take home).

*We reserve the right to make changes in eWorkshops content, software & hardware.

Continued on other side...

9. Casual Game Production 1

Love playing games? Develop your game-building skills using Game Maker and create your own new action game. Let your imagination run wild!

10. Casual Game Production 2

Ready to take the next step into the gaming world? Take a role in a development team: direct the graphics, programming, sound-track or story-board, then merge all the pieces together!

•Prerequisite: Casual Games Production 1 (#9) or experience with Game Maker.

11. Game Modding

Create your own Warcraft III® based game! Use the 3D game engine, draw your maps and characters and set rules to create games with a completely original feel and scenario.

12. Mobile Phone Games

Use cool studio software to design games for mobile phones. Choose characters, environments and objects and plan the game script and rules!

13. Web Design 1

Get yourself online! Create your own website in HTML and add images, backgrounds and links.

Make your website unique and publish it on the web for everybody to surf!

14. Web Design 2

Upgrade your web design skills with Adobe® Dreamweaver® to develop professional-looking web pages.

Use Photoshop® and Flash® to create unique graphical interface!

•Prerequisite: Web Design 1 (#13) or experience with HTML

15. Dynamic Web Sites

Add programming in PHP to enhance your website with dynamic content! Collect information from users with forms, protect content with passwords and create web applications.

•Prerequisite: Web Design 1 (#13) or experience with HTML

16. Build a PC

Build your own new PC and take it home after camp. Connect all parts including motherboard, Intel® CPU, hard drive, memory and a DVD drive. Set your new computer up for Internet, games and more!

•Ages 13-18 • \$220 Lab fee (includes a computer to take home).

17. Build a Game Console

Build a retro console, based on the Fuzebox kit. Solder electronic parts on the circuit board and program the micro-processor with cool retro-style video games. Take it home and play on your TV!

•Ages 13-18 • \$120 Lab fee (includes a console to take home).

18. Robotics

Use the BoeBot® kit to build your own rolling robot! Learn the basics of robotics and program the robot's code to define its actions and reactions. Take your Robot home and keep upgrading it after camp!

•Ages 10-18 • \$150 Lab fee (includes robot and kit to take home).

19. Programming 101

Your first step into the software industry. Learn the basics of computer programming with Microsoft® Visual C# language (C-Sharp). Code your first programs and simple computer games!

20. C++ Programming

Upgrade your coding skills. Dive into the world of C++ and learn the basics of object-oriented programming. Use arrays, types and classes to develop even more complicated programs!

•Prerequisite: Programming 101 (#19) or experience with other programming language

21. Phone Apps Development

Start programming simple apps and games for the most advanced Google® Android phones. Code in Java, run the programs on the phone and share them with friends!

•Prerequisite: Programming 101 (#19) or experience with other programming language

22. Console Zone Extra

Extend your time in the eCamp big screen console game room. Play Wii® games, Guitar Hero®, DDR® on the PlayStation® or the Xbox360®.

- Consult with other eCampers before you choose your eWorkshops at facebook.com/eCamp.
- Staying for more than one session? Check eCamp4u.com for multi-session track recommendations.
- Check online for the newest updates and additions to the workshop list.
